

How to Use the AAC Rubric Wordsmith

Searching for a word? The wordsmith can help you find words that describe various levels of quality. The following sample demonstrates how to use the wordsmith to assist in creating the rubric descriptors.

<p>Step One State criteria as action verbs and link to learner outcomes. Criteria are placed in the left hand column.</p>	<p>Step Two Flesh out the action of the criteria by providing the context of the assessment task. Note that the basic description is the same for each level.</p>	<p>Step Three Select descriptors for each level from the wordsmith (see excerpt below). Depending on the context of the assessment task, you may need to select words from more than one row in the wordsmith.</p>

The AAC Rubric Wordsmith is organized around the following key process skills that are important for students to demonstrate:

- selecting the right information
- selecting enough information
- drawing conclusions
- providing support for opinions
- designing/constructing
- organizing/formatting
- developing questions/making predictions
- analyzing information/data
- communicating information

This is not an exclusive list, but rather represents key higher level process skills that appear frequently in programs of study.

Notes of Caution

The words in the wordsmith have been copied from existing rubrics and are meant as a starting point for your rubric construction; however, because they came from a specific context, the words may not be appropriate for the specific context you are creating.

The descriptive words from the wordsmith should not float between levels. For example, the word **substantial**, which is used to describe proficient work, should not be used to describe work that is excellent or adequate. To put it simply, once a level 3 word, always a level 3 word.
